Brussels BE

#### Client

LURI 1, LURI 2

#### Price

€55.000.000

#### Architects

Altiplan  
Estudio Lamela

#### Temporary partnership

Willemen General Contractor, Cordeel

#### Engineering Office

CES (speciale technieken)

#### Construction period

2 years 6 months

#### Start work

03-2014

#### End of work

09-2016

Standing 107 metres tall with 33 storeys, the Astro Tower is the fifth tallest building in Brussels and the tallest passive building in Belgium. The Astro Tower's offices, measuring a spacious 35,000 m<sup>2</sup> and dating back to 1974, have been redesigned and optimised. The façade was given a brand-new look in blue mirror glass. Three additional storeys were built atop the tower to house the technical rooms. There is a five-storey car park underneath the building. At the end of 2016, 1,200 employees moved into the building.

### Willemen Construct

Boerenkrijgstraat 133
